Thermostaic towel radiator valve HBV-G-P graphite right

Thermostatic valve allowing you to easily connect an electric heater to the radiator.

The set consists of two tees integrated with valves (thermostatic and return).

The heater can be connected via any of the two tees.

The set allows you to install the heater not only in traditional bathroom radiators with a wide bottom connection but also in radiators with a connection in vertical collectors with a spacing of 50 mm (e.g. Uncommon).

Axial figure left.
