Product specification

Manufacturer	WALMER	Unit	pcs
EAN	5905674938541	Dimension	1540 x 540 x 390mm

The **MG-PROFI 1200 tile cutting machine** is the latest manual device for cutting tiles (glaze and terracotta) from WALMER - created for professionals.

An innovative side breaking system is used, which causes the tile to be broken with equal force along its entire length.

Device parameters:

Guide: flat bar 30x16mm

Roller bearings

Maximum cutting length: 1280mm

Ruler for measuring cutting width

A black and yellow culaga screwed on both sides to measure the cutting width of the tile

Measure 450 to facilitate cutting tiles diagonally (diagonal)

Base width before unfolding the base: 470 mm

Base width after unfolding the base: 780mm

Movable half of the table for breaking tiles

Foldable tile breaking lever

Retractable base to support larger tiles

Two red skids holding the plate

Possibility to change the height of the skids for thicker tiles

Two swivel wheels

A Ø8 cutting knife is standardly installed, it is possible to use knives with a blade diameter of Ø10 or Ø12

Hole in the rear guide bracket for easy replacement of the cutting knife

Foldable legs with locking knobs
