

# Nano-silicone render PRIMO 1.5 mm white 25kg

Manufacturer	
Weight	25.00 kg
Product Code	PRIMO
EAN	5904484112141
SKU	004112
Advice IBB	
IBB ID	14012

## Product specification

Manufacturer	SEMPRE	Unit	bucket
Colour	white	EAN	5904484112141
Coverage	2,3 kg/m2		

### Nano-Silicone render PRIMO dotted 1.5 mm white 25kg

The latest generation of decorative and protective plaster mass using innovative technologies, based on top-class ingredients, such as silicone resins and fillers that allow for obtaining a beautiful and even structure. Designed for decorative and protective coatings inside and for use outside buildings on typical construction substrates, such as concrete, cement and cement-lime plaster, as well as covered with acrylic paints. HYDRO STOP TECHNOLOGY increases the hydrophobicity of the coating, which makes the surfaces easy to wash with water, extends the product's service life and extends its attractive appearance, which reduces the costs associated with renovation or painting. Increased full resistance to: high temperature amplitudes, UV radiation, microcracks and scratches, moisture is obtained. NANOTECHNOLOGY - a special formula with silicon nanoparticles strengthens the combination of the plaster binder containing silicone resins, reduces unsightly, dark streaks after rainfall. BIO STOP TECHNOLOGY inhibits the growth of microorganisms, molds and bacteria.

#### Characteristics:

- easy to apply and invoice with a trowel
- a large selection of granulations
- increased resistance to algae and fungi
- high hydrophobicity
- high water vapor permeability
- high flexibility after drying
- high color stability
- environmentally friendly
- contains nano silicon
- high resistance to the development of microorganisms, mold
