Unit

pcs

A light wheelbarrow with a stable structure, made of sheet metal covered with chip-resistant black paint. Perfect, for example, for the garden, allotment or light housework. The wheelbarrow is intended for transporting solid and loose materials in gardening, cleaning and construction works. The rigidity of the structure, high stability and driving comfort result from the fact that the frame is made of a curved, powder-coated pipe. The wheelbarrow is made of 0.7 mm thick sheet metal and is equipped with a standard 400/8 inflatable wheel on a steel rim and non-slip plastic handles. Designed for self-assembly, so it takes up little space in transport and storage.

Assembly is extremely simple and involves connecting the individual elements supplied in the set with screws:

Embossed bowl 1 pc.
Frame (handles) 2 pcs.
Wheel protection 1 pc.
Brackets 2 pcs.
A wheel with an axle
Set of screws
