Hydroabsorbent tile sponge for washing tiles after grouting - 130x190x70 mm

COMENSAL HYDRO-absorbent tile sponge designed for cleaning tiles after grouting and other works requiring effective surface cleaning. It has a porous structure. It picks up impurities well without leaving streaks. It is very absorbent, thanks to which it cleans the dirty surface without splashing. It is quickly rinsed and squeezed out of excess dirty water, easily obtaining the expected level of humidity. It can even be done with one hand: the shape of the cube is handy and designed for comfort.

The COMENSAL HYDROsponge is also widely used in other renovation works and sanitary activities related to the household.

Purpose: For cleaning tiles after grouting and other works requiring effective removal of mortar, glue or dirt residues without splashing water. Also used in the household for all kinds of sanitary work.

Functionality: The sponge has the shape of a handy cube with dimensions of 130 x 190 x 70 mm. It is easy to squeeze it to obtain the expected humidity.

Quality

The sponge is made of high-quality raw material. It belongs to the group of polyurethane sponges. It is resilient and porous. It is easy to rinse and squeeze. Clean and dried after work, it will fulfill its functions for a long time.
