

# Universal expanding foam with nozzle PCV 750ml

Brand	BORAMAX
Manufacturer	
Weight	0.05 kg
Product Code	PVC PPU-1
EAN	5901738720107
SKU	000496
Advice IBB	
Application	Designed for installation of PVC, wooden and aluminum joinery, window sills, stairs, bathtubs etc
IBB ID	9681

## Product specification

Manufacturer	BORAMAX	Unit	pcs
Brand	boramax	EAN	5901738720107

### LOW PRESSURE, QUICK-DRYING, TUBE PVC FOAM

It has a new generation formula that gives it very good adhesion to PVC profiles.

Low-pressure PVC foam is a foam that expands only until the gap is completely filled, without exerting strong pressure on the mounted frames and profiles, which prevents them from warping and deforming.

Designed for installation of PVC, wooden and aluminum joinery, window sills, stairs, bathtubs and shower trays.

The exceptionally dense and durable sealing foam has a low-pressure formula, is characterized by high bonding strength, seals, insulates and glues very well.

The product also has very good sound and heat-insulating properties and hardens quickly, which shortens installation time.

It is also available in a WINTER version, in which its specially modified formula allows operation at low ambient temperatures down to -10°C.

Foam with a hand applicator.

### PROPERTIES

Resistant to fungi and mold

High performance

It seals, dampens, insulates and glues very well

Does not distort profiles

Short initial hardening time
